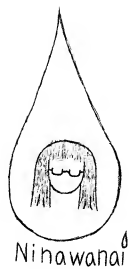
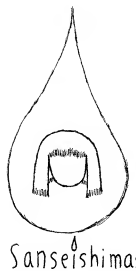
Itsumo Ame





*Stand up

Aha!

Yes, good timing.

Hello, you said you wanted to talk to me about something?

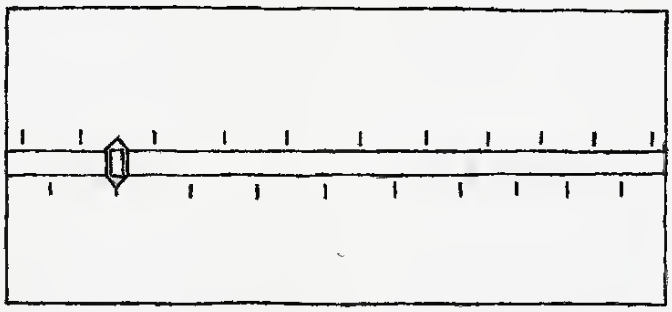
(has been waiting 2 weeks for someone to say 'good timing')

Just how good is a person's timing? I created a device to measure this.

. . .

So then, I wanted your input on order-

It goes from 'kept your job today' to 'saved the world'.

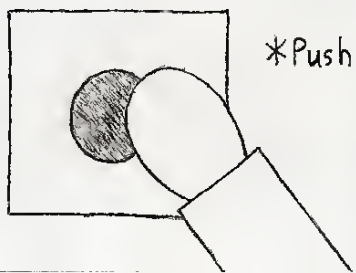


The 'How good is your timing?' metre!

Do you have anything else you have created?

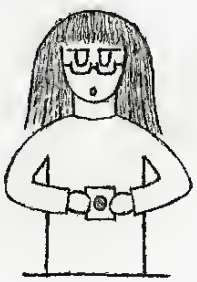
'146.'

What does it say about me?



*Push

Hmm~



I have this button.

Anyway, you were saying something about order?

So what did it do?

Ah, yes.

With names, Senior comes before junior, however with school years, junior comes before senior.

It sent a message to the writer.

But 'senior' is always the older one and 'junior' is always the younger one.

I don't get it.

Fair enough.

Me neither.
